Re: Prequalification Approval
Federal Tax ID# 22-3118841

Dear Mr. Raman:

Based upon the information furnished on your Prequalification Application, the New York City School Construction Authority (SCA) has requalified your firm to submit bids/proposals for SCA projects for a period of three years until **March 31, 2010** for the following trade(s): **General Contractor (99999 – S.C.I. Code)**.

However, prior to performing work for a specific SCA contract, the SCA must first approve your firm in writing. Although requalified with the SCA, your firm will be subject to a full responsibility determination at the time of consideration for any specific contract award.

The NYCSCA and the Building and Construction Trades Council (BCTC), its member unions and the Bricklayers/Allied Craft Workers, Local Union 1 have entered into a Project Labor Agreement (PLA) that governs projects under the SCA's Capital and Restructuring Programs. The PLA requires that all contractors performing such work use labor from the participating BCTC trades. As a condition of contract award, each successful bidder and its respective subcontractors must agree to become signatories to the PLA, and as such, participate in the apprenticeship programs of all trades needed for the Project.

In the case of non-PLA projects (including capacity, and lease projects), the SCA will continue to verify prior to contract award a firm's participation in a New York State Department of Labor approved apprenticeship program. For further information regarding the PLA visit the SCA's website at www.nycsca.org

Furthermore, we remind you that your firm's status as a "Requalified firm" is always subject to review. Should future events result in substantive change(s) in the information you furnished on your application (e.g. ownership, key people, address, Tax ID number, court proceedings, financial condition, expansion of services, etc.) you **must** notify this office immediately.

If you have questions regarding your status, please call the Contractor Qualification Unit at (718) 472-8777.

Sincerely,

Patricia A. Chirumbolo
Director, Operations
